Welcome to DSAI 2015, the 6th International Conference on Software Development and Technologies for Enhancing Accessibility and Fighting Info-exclusion. DSAI 2015 will take place in June 10-12, 2015 in Fraunhofer FIT, Sankt Augustin, Germany.

Information and Communication Technologies (ICT) play a major role in our lives. However, ICT development which is indifferent to the concerns of social inclusion may raise barriers and increase the gap between the average user and those with special needs, instead of contributing to eliminating this gap and promoting equal rights and opportunities for all.

Senior citizens and others with special needs are often faced with multiple minor disabilities that prevent them from enjoying the benefits of technology and higher quality of life standards. According to the UN Convention on the Rights of Persons with Disabilities, technology design should take into account accessibility and usability features for the protection and promotion of the human rights of persons with disabilities, in all policies and programmes.
